(3 Pack and Reusable Nozzle)

Less Waste & More Shelf Space

24 Cans

Competitor Cans

Competitor cans are twice as large for the same number of uses

Different spray styles require stocking additional canister SKU's

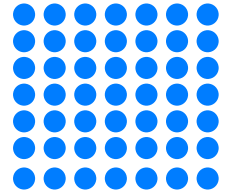

VS

CoolJect Cans

Smaller can size for the same number of uses

No need for different spray styles and stocking additional SKU's

48 Cans

Elevated Comfort

Providing the best experience for patients by reducing injection pain.

One-Handed Use

The only device to offer single-handed ability to numb and inject quickly.

Fast-Acting

CoolJect mist has the quickest numbing onset & time to injection only takes 4-10 seconds.

Targeted Application

Targeted blanched area for immediate, accurate needle penetration.

Cost-Efficient

CoolJect provides over twice the amount of uses per ounce than the competition.

Non-Toxic

A safer alternative to ethyl chloride, is hazmat free, and non-flammable.
